DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamen (US 4137915). Kamen discloses a drug solution injector comprising a drug solution reservoir 12 for storing a drug 26 therein and a pressurization mechanism for continuously discharging the drug (the pressure of the fluid forces the fluid out of the bag), an injection line 18, the solution reservoir is provided with a weighing scale 10 for weighing the weight of the drug stored in the reservoir. The weighing scale comprises an elastic body 28 fixed at one end thereof to the drug solution reservoir and the displacement of the elastic body determines the weight of the drug in the reservoir. See Fig. 1. The elastic body 28 has a holding portion 32 on the end opposite the end fixed to the reservoir.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamen in view of Martin (US 4722732). Claim 2 differs from Kamen in calling for the drug solution reservoir to be a balloon formed of an elastic material. Martin discloses a drug supply system wherein the drug reservoir is an elastomeric balloon enclosed in a housing 12, the balloon provides a constant pressure to the drug to ensure steady flow of the fluid out of the reservoir and the housing protects the balloon from being acted upon by outside forces. (col. 2, lines 9-18). It would have been obvious to one of ordinary skill in the art at the time of invention to modify the drug reservoir of Kamen to be formed of an elastomeric balloon as taught by Martin so that the drug is propelled out of the reservoir at a steady rate.

Allowable Subject Matter

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
